connect to eduSTAR Wireless network

Chromebook

1. Select the "eduSTAR" Wi-Fi network.
2.
 - Change the "EAP method" to "PEAP" in the drop-down menu.
3.
 - Change the "EAP Phase 2 authentication" to "MSCHAPv2" in the drop-down menu.
4.
 - Change the "Server CA Certificate" to "Do not check" in the drop-down menu.
5.
 - In the "Identify" field, type in your wrc account username e.g., TIM0022
6.
 - In the "Password" field, type your WRC account password.
7.
 - Leave the "Anonymous Identity" field blank.
8.
 - Leave "Save Identity and password" checked.

Press "Connect"

Press Accept and Continue to Google's Terms of Service

Navigate to the bottom right of the screen, press the Wifi icon

Press the gears on the eduSTAR network (now connected)

Proxy options should appear in the popup dialog

Setting up a new Chromebook laptop

1. Start the laptop and follow the Google setup wizard prompts.
2. Sign in with or create a **personal** Gmail account e.g. johnsmith@gmail.com.
3. Once setup is complete, install the **Intune Company Portal** app from the **Google Play Store**.

Do **not** sign in to the Intune Company Portal app. This will be done on the first day of school.

1. **Bookmark** and/or set the browser (edge recommended) home page to the **Student Dashboard**.

<https://wrc.vic.edu.au/student>

NAPLAN is not available for Chromebook

Setting up an Existing Chromebook laptop

1. If not already installed, get the **Intune Company Portal** app from the **Google Play Store**.

*Do **not** sign in to the Intune Company Portal app. This will be done on the first day of school.*

1. **Bookmark** and/or set the browser (edge recommended) home page to the **Student Dashboard**.

<https://wrc.vic.edu.au/student>

NAPLAN is not available for Chromebook
