

Getting ERROR: Class
classcode: Number of new
and removed enrolments
exceeds acceptable
threshold. (New: 0.8387097
> 0.75, Removed:
0.7619048 > 0.75)

If the sync is getting the ERROR: Class classcode: Number of new and removed enrolments exceeds acceptable threshold. (New: 0.8387097 > 0.75, Removed: 0.7619048 > 0.75)

This is because the sync is making too many changes and we need to call compass to have temporarily adjust these safety settings this will reduce the safety checks for 2 hours compass will email you for you to Consent to the Safety Check Adjustment temporary lowering of safety checks
